Space Exploration Series-Function Introduction

Battery Instructions

Space Exploration Series-Function Introduction

Create the dream of exploring space for children; the vast starry universe can satisfy children's interest in space exploration, the simulated space scene lights up the child's wonderful childhood.

Combination Set

Space series products can be matched with each other and are more interesting.

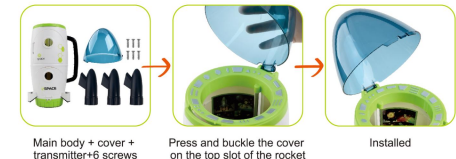

The return capsule can be rotated and played on the space station.

The rover can be linked to the space station to simulate data transmission.

Big Rocket Installation Guide

The cool big rocket is split into multiple accessories, let the baby install it by himself. Deepen the baby's knowledge of the product, increase the playability of the product, and let the baby have more fun.
